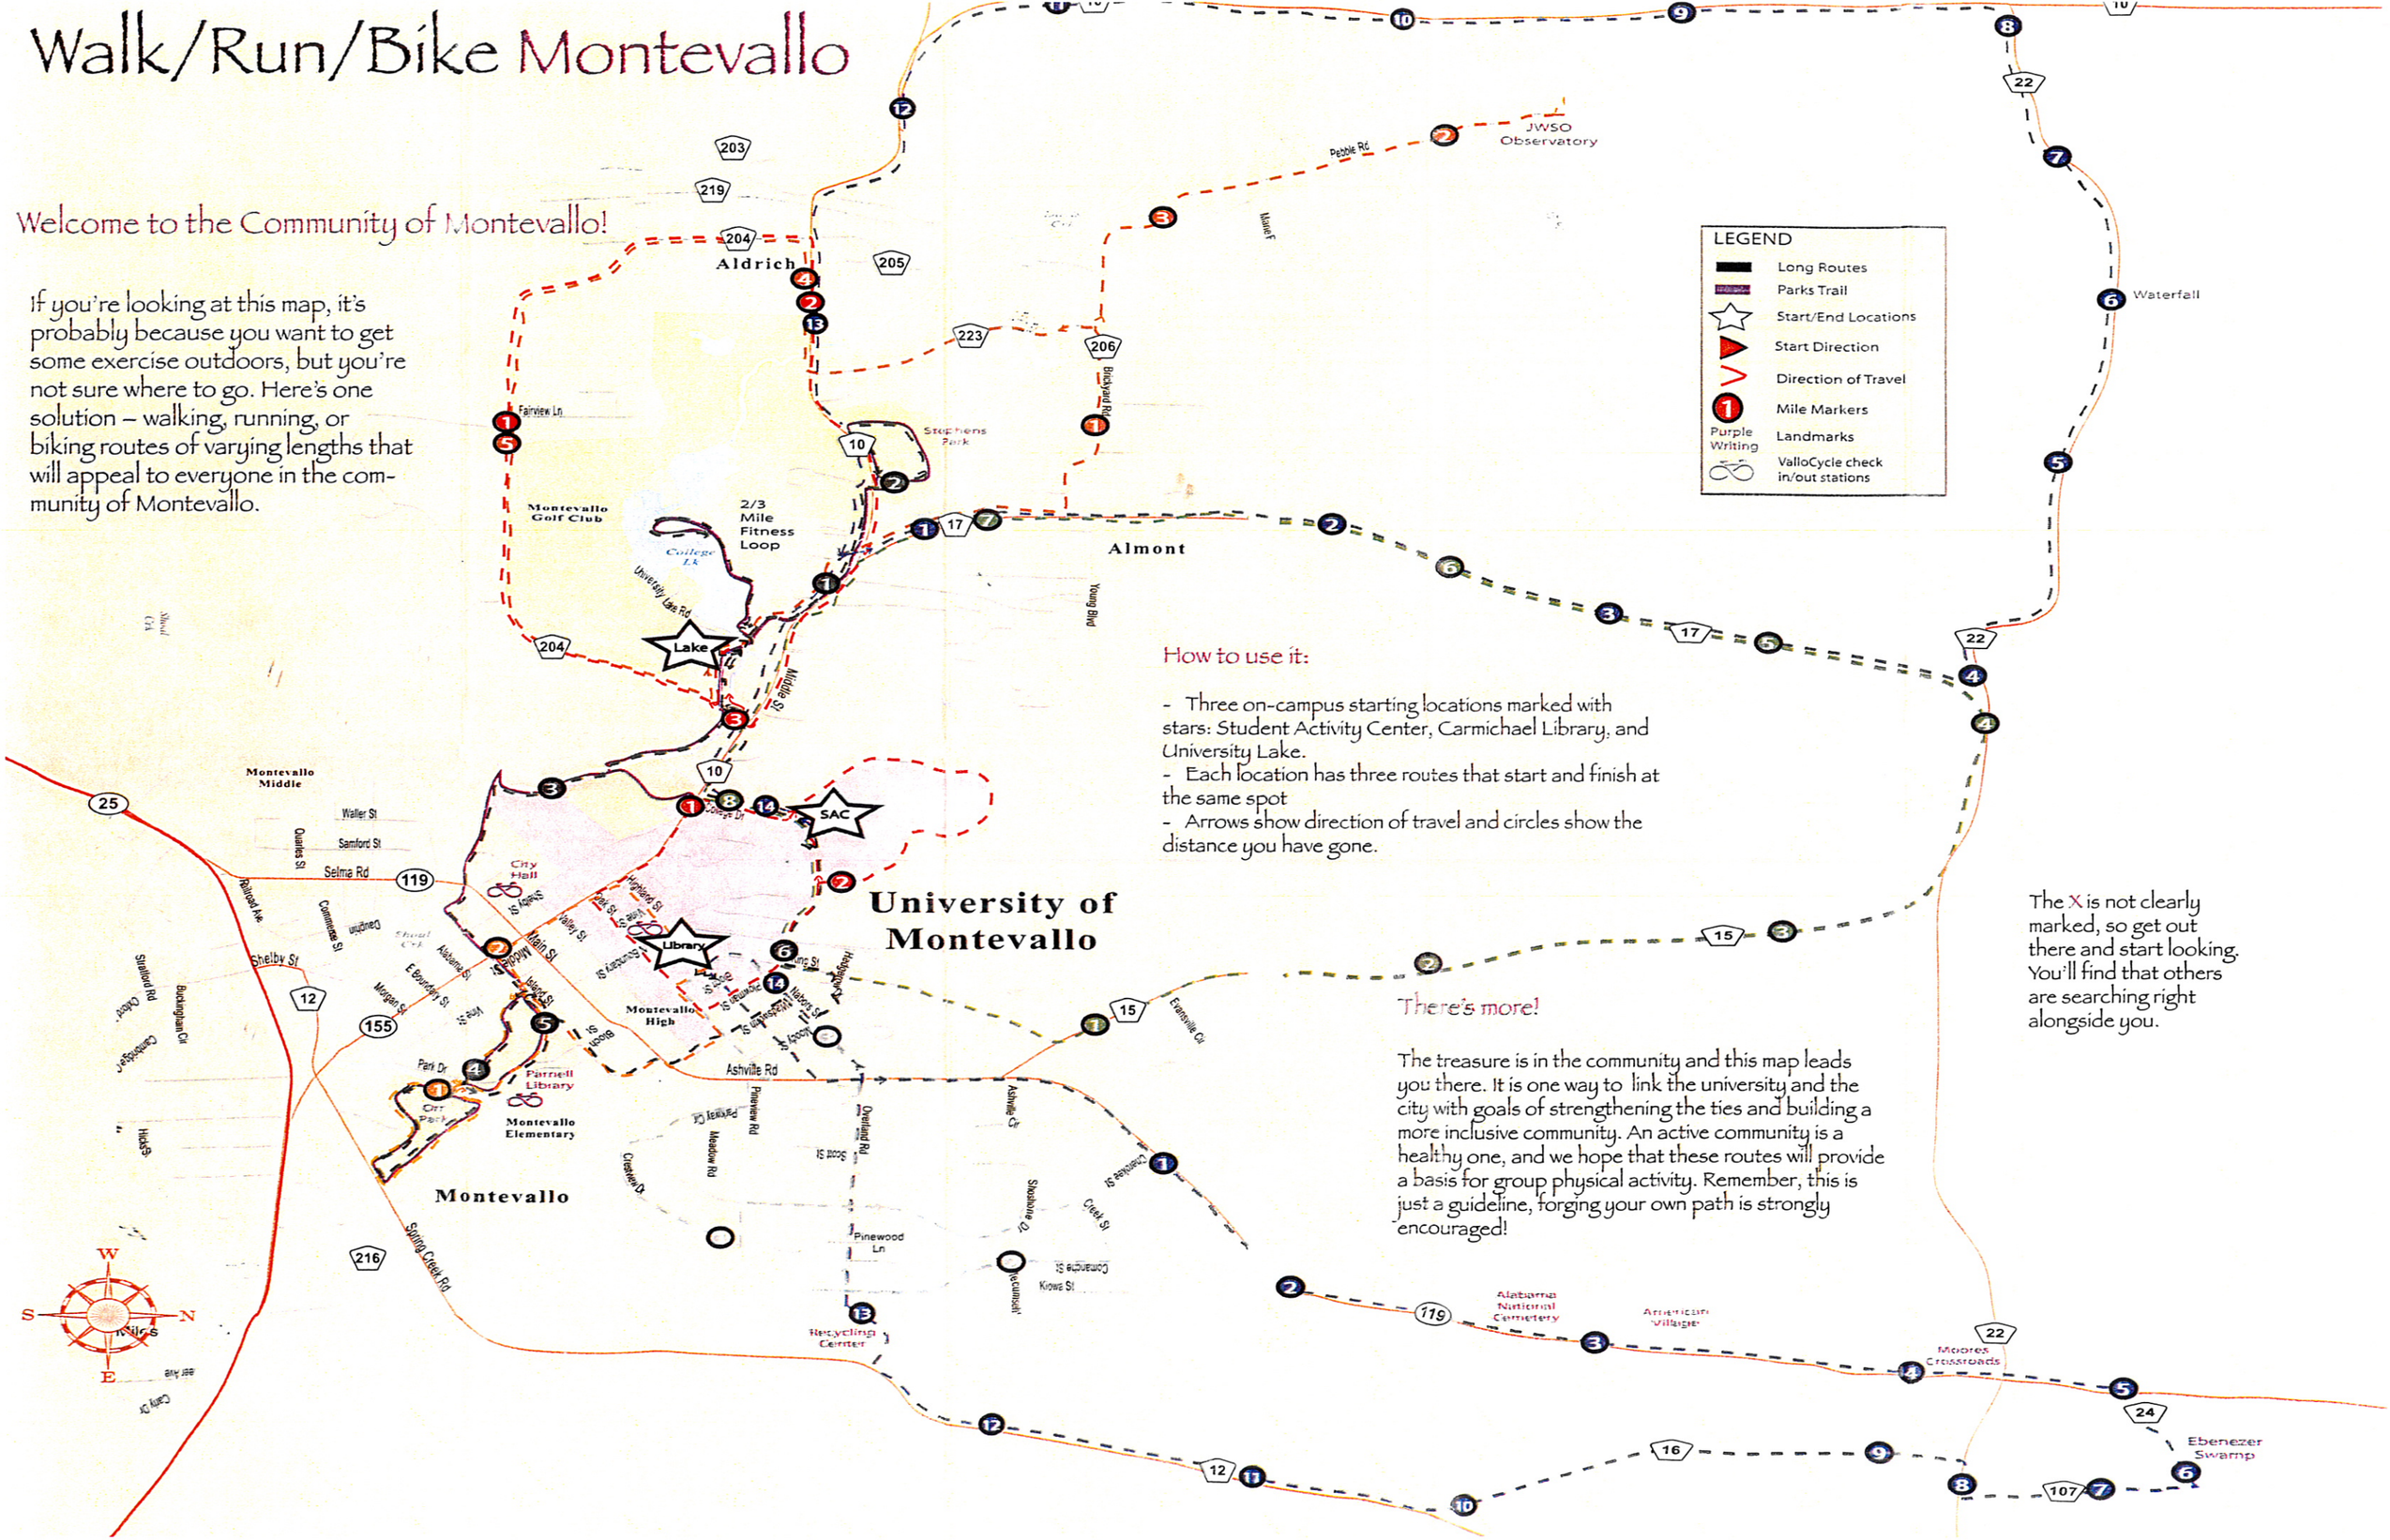
Walk/Run/Bike Montevallo

Welcome to the Community of Montevallo!

If you're looking at this map, it's probably because you want to get some exercise outdoors, but you're not sure where to go. Here's one solution – walking, running, or biking routes of varying lengths that will appeal to everyone in the community of Montevallo.



How to use it:

- Three on-campus starting locations marked with stars: Student Activity Center, Carmichael Library, and University Lake.
- Each location has three routes that start and finish at the same spot
- Arrows show direction of travel and circles show the distance you have gone.

The X is not clearly marked, so get out there and start looking. You'll find that others are searching right alongside you.

There's more!

The treasure is in the community and this map leads you there. It is one way to link the university and the city with goals of strengthening the ties and building a more inclusive community. An active community is a healthy one, and we hope that these routes will provide a basis for group physical activity. Remember, this is just a guideline, forging your own path is strongly encouraged!
